

PRECISION GUN SPECIALTIES SAF-T-TRAINERS

Brightly Colored "Dummies" For Training Exercises

Brightly colored plastic and a different "feel" makes sure you won't confuse these for live rounds. Popular with many departments and agencies for use in Immediate Action training for just that reason. These do not duplicate weight and balance of loaded rounds or function-testing dummies. 

SPECS: Orange or yellow plastic. Rifle and Handgun calibers supplied 50 or 10 rounds per bag. Shotgun calibers supplied 25 or 10 rounds per bag. 9mm Makarov. (9mm Mak).

SAFETECH SAF-T-ROUND

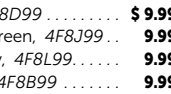

Visible Proof That Chamber Is Empty; Firearm Is Safe

Bright, international orange tab gives clear indication of weapon condition. Provides the user, range safety officer and bystander alike with a visual and physical method of determining that a firearm is safe. Machined, brass case head lets you rapidly work the action and eject the Saf-T-Round. Molded from heat-resistant nylon polymer to provide lasting durability; won't deform after repeated use.  **SPECS:** Polymer, international orange, brass head. Sold as one per pack.

RAVEN CONCEALMENT SYSTEMS TOPSTOP AR-15 UPPER RECEIVER COVER

Secures & Protects a Detached Upper for Storage & Transport

The TopStop cover snaps on the underside of a mil-spec AR-15 upper receiver when it's detached from the lower. It secures the charging handle and bolt/carrier group and keeps dirt, dust, and other contaminants from getting inside the receiver. Made of a super-tough, flexible polymer that's impervious to most solvents and chemicals. Great for storing or transporting spare upper receivers - and ideal for low-profile concealment bags that require the rifle to be broken down to fit. You don't realize how much you need one of these until you use it! A variety of colors to choose from, including bright Safety Orange and High-Visibility Yellow.

TRIPLE-K DELUXE SNAP CAP FOR RIFLE/ PISTOL/SHOTGUN

Save Firing Pins - Shoot Better
With Safe, Dry-Fire Practice

The spring-loaded "primers" in these snap caps act much like a live primer and cushion the blow so firing pin and bushing damage won't occur. Bright color and "different" feel to prevent mixing with live rounds or function-testing dummies. (Don't use snap caps as dummies - they don't duplicate loaded round weight/balance).  **SPECS:** Brass base, plastic body.

CHAMBER-VIEW® SAFETY BLOCK

High-Visibility Indicator Of Chamber Empty Status

Bright orange silicone chamber blocks give instant visual confirmation of an empty chamber. Silicone rubber will not mar finish and the tapered shape helps the block fit easily into the chamber. Bright hunter-orange color makes it easy to see, and the block helps seal the chamber against water and debris. **Pistol** fits 9mm and .40 caliber semi-auto pistols. **Shotgun** fits most pump and semi-automatic shotguns from 12 gauge down to .410 bore.

CLOUD DEFENSIVE REIN WEAPON LIGHTS

Extremely Bright -
Up to 1,400 Lumen Output;
Charger Included;
Standard & "Micro" Models

The REIN represents a quantum leap forward in both performance and critical features that shooters need in a gun-mounted light. Putting out well over 60,000 candela at 1,400 lumens, it's one of the most powerful weapon lights on the market. The REIN is fully compatible with any platform that allows for traditional Picatinny, M-LOK® or KeyMod light mounts.

Standard REIN Light Complete Kit includes REIN light assembly, remote switch tail cap assembly with integrated pushbutton, 2 LCS side plates with hardware, 1 Picatinny rail mount with all mounting hardware, 1 Cloud Defensive Nitecore Charger, 1 micro USB to USB cord, 1 Samsung 30Q 18650 rechargeable battery. Light body is precision machined from certified 6061 T6 aluminum, Type III hard-coat anodized. No CR123 batteries allowed! *Use of CR-123 batteries voids warranty.* Use only the supplied Samsung 18650 30Q with the REIN. The 30Q battery has more output with shorter run-time of 85-90 minutes. Accepts ALL protected and unprotected 18650 batteries. Accepts both button-top and flat-top batteries. NOTE: Various battery sizes will require use of the provided Battery Jack feature. **Micro** model puts out well over 55,000 candela at 1,300 lumens, it is one of the most powerful weapon lights on the market. **Micro Kit** includes REIN Micro, 1 remote switch tail cap assembly with integrated pushbutton, 2 LCS side plates with hardware, Picatinny rail mount for the REIN with all mounting hardware, 1 Cloud Defensive Nitecore Charger, micro USB to USB cord, and 1 Orion 18350 battery.

CRIMSON TRACE CMR-301 RAIL MASTER PRO LIGHT/GREEN LASER

TWO Powerful Forms
of Illumination in a Compact,
Easy-To-Mount Unit

The CMR-301 Rail Master Pro pairs up a blinding 1,000 lumen light with a powerful green targeting laser to significantly boost the effectiveness of your tactical/home-defense rifle or carbine. The extra-bright green laser enables targeting in a variety of lighting conditions. The CMR-301 is user programmable and may be operated with a pressure pad or tail-cap switch. Fits standard AR-15s and modern sporting rifles with M1913 Picatinny or similar accessory rails measuring at least 2 3/4" in length. The Class 3R 5mW green laser's dot measures 5" dia. at 50 yards. Runs on one CR-123 battery.

CRIMSON TRACE CMR-209 COMPACT RAILMASTER UNIVERSAL PISTOL LIGHT

Lightweight, Affordable, Easy
To Swap from Gun To Gun &
200 Lumen Output

The CMR-209 is an excellent multi-platform lighting solution when a tight budget is a factor. Because the universal mounting system works with virtually any pistol, rifle, or shotgun equipped with a Picatinny or Weaver rail, you can swap the CMR-209 back and forth between multiple guns. As a bonus, the feel and operation of the light stays the same, regardless of which gun you're using. There's a tough, lightweight, water-resistant, reinforced polymer housing, and a simple screw-clamp with recoil lug for engaging the gun's rail. The CMR-209 runs on one CR-123 battery and uses a simple tap-on/tap-off instant activation control, so when you need the light, it's there. The output is a bright, clean 200 lumens of white light that'll run for up to 1.5 hours. Fits pistols with M1913 Picatinny (or similar) accessory rail measuring at least 1" from recoil lug to triggerguard. Peace of mind, consistency, and value. What more could you want?

INFORCE WML/WMLX GEN2 WEAPON LIGHTS

Compact & Powerful
Picatinny Mounted Light; IR
Option Available

Rugged, powerful LED weapon light attaches quickly to any MIL-STD 1913 Picatinny rail to provide brilliant light for close- to mid-range applications. Easy to access, integral, rear-facing activation switch toggles between momentary-on, constant-on, and assailant-disorienting strobe. Mechanical lockout system prevents accidental activation. Heat dissipating vents protect the LED emitter from thermal overload and damage due to overheating. **WML White** model offers a 400-lumen output with 1.5 hour battery life. **WML White/IR** adds to the white LED output a second, infrared light option with 100mW output for up to 4 hours. The more powerful **WMLx** model cranks out an amazing 800 lumens of brilliant white light and does it for up to 2 hours! With its penetrating center beam and generous peripheral light, the WMLx is ideal for long distance target identification. **WMLx White/IR** adds an IR mode (400mW) with a 4 hour runtime and a 700 lumen output from the main light with a 2 hour runtime. **USA**

SPECS: Fiber-reinforced hard polymer composite, Black or Flat Dark Earth (FDE). **WML - 4.1" (10.4cm) OAL, 1" (2.5cm) bezel O.D., 3 oz. (85g) wt. Uses one CR-123A lithium battery, included. WMLx - 5.3" (13.5cm) OAL, 1.1" (2.8cm) bezel O.D., 4 oz. (113.4g) wt. Uses two CR-123A batteries, included.**

MODLITE PL350 PISTOL LIGHT

Blistering 1,350-Lumen Output from a Light That Fits on Your Compact Daily Carry Pistol

The Modlite PL350 weapon light for pistols has an interchangeable head that can be swapped with current AND future Modlite heads. It comes with its own rechargeable battery you can remove and pop into the (also included) charger without taking the PL350 off the gun. Utilizing two rail keys (included), the PL350 can fit on both "universal" and M1913 Picatinny handgun rails. It's powered by a single, rechargeable 18350 battery (included) that can be used in other Modlite lights. If you're looking for excellent overall output, the PL350 cranks out approximately 1,350 out-the-front lumens, and approximately 54,000 candela. That's a LOTTA shine from a compact pistol light. The PL350 is an excellent overall light for indoor or outdoor use. Modular design is compatible with all slim Modlite heads, which lets the end user customize the light output to their specific needs. Comes with a full set of PHLSTER ARC enhanced WML Switches, further letting the end user tailor the light to fit their hands and shooting methods. 4" long x approx. 1-1/4" wide/tall. 5.5 oz. with battery. **Caution:** Lithium CR-123 cells are NOT supported and if used in the PL350 can heat up and possibly explode or catch fire. Stick with the rechargeable battery that comes with the light! **USA**

MODLITE SYSTEMS OKW 18350/18650 MODULAR WEAPON LIGHTS

Versatile, Adaptable, Upgradeable
Lights With a LONG Reach

As its name indicates, the Modlite is designed to be upgraded and reconfigured as your needs change. The basic Modlite package contains a complete light consisting of separate light body, OKW light head, and tailcap, plus two KeepPower batteries and a Nitecore D2 charger. The bezel is made of 6061 aluminum with a hard-anodized finish, and the ultra-clear Borofloat® lens delivers 98-99% light transmission, so almost all of your Modlite's 680 lumen (69,000 candela) output is at your disposal. Other lights offer more lumens but scatter them; the Modlite concentrates its light for extreme throw, making it an excellent choice for both indoor and longer-range outdoor applications. The light body has two 8-32 tpi threaded holes for attachment to the light mount of your choice. Each complete light is tested for proper operation before it leaves the factory. Some of the swap-on/off components are listed below - and we have even more on Brownells.com. **18350** model comes with two 1200mAh KeepPower battery packs that give about 35 minutes runtime each. Larger **18650** model comes with two 3500mAh KeepPower battery packs that give about 75 minutes runtime each. **USA**

MODLITE PLHV2-18350/18650 WEAPON LIGHTS

A Compact, High-Output Light System Interchangeable With Other Modlite Components

The Modlite PLHV2 weapon light system for long guns pumps out a blazing 1,350 out-the-front lumens (approximately 54,000 candela) of clean, white light. The PLHV2 is an excellent overall light head for indoor or outdoor use. It is a large step forward from the PLHV1; lumen output is about the same, but throw is greatly improved. It provides an excellent balance of flood and throw, and if you're looking for the best overall output and throw, you'll have a hard time beating its Cool White 5700K emitter. The PLHV2 has been tested to withstand select fire SCAR 17 recoil. It consists of a PLHV2 light head, 18350 or 18650 body, a single KeepPower 1200mAh 18350 or 3500mAh 18650 high-drain battery, and an XTAR MC2 charger. You can get it with or without a tail cap, so if you already own some Modlite tail caps or want a remote switch, you don't pay for something you're not going to use. The ultra clear Borofloat® lens delivers 98-99% light transmittance. 6061 aluminum housing with military-grade hardcoat anodized finish. Runtime is about 35 minutes with 18350 cell, 75 minutes with 18650 cell. **Caution:** DO NOT use Lithium CR-123 cells in the PLHV2. There is a risk they will overheat, possibly exploding or catching fire. **USA**

STEINER OPTICS DBAL-A3 CIVILIAN LASER & ILLUMINATOR

Brings Military Type Technology To The Civilian Market

Compatible with NVD, this civilian grade DBAL-A3 comes with an infrared illuminator, infrared pointer and the brightest visible aiming laser allowed by law. Adjustable IR illuminator allows the user to switch from a narrow 2" beam to a wide 30" beam that floods an area with infrared light for easy surveillance with night vision devices. The IR laser can be seen for 275 yards while the green aiming laser is visible out to more than 800 yards. Both the IR laser and visible laser are co-aligned, meaning the lasers can be simultaneously zeroed. Sight includes a single laser activation switch, high/low power modes plus low profile windage and elevation adjustments. Dual remote cable ports allow the operator to plug a tactical light directly into the laser housing. The DBAL-A3 also includes mounting holes for a flip-up front sight, sub-miniature red dot sight or a MIL-SPEC-1913 top rail. Robust aluminum sight is as rugged and reliable as the military issued device it's based on. *Item ships directly from manufacturer. Please allow 5 additional business days for delivery.* **USA**

STREAMLIGHT

TL-RACKER SHOTGUN FOREND LIGHT

Gives You 1,000 Lumens of Powerful Illumination - Plus, NO Loose Wires

Streamlight's all-in-one integrated shotgun forend light pumps out a whopping 1,000 lumens of light, making it ideal for a home defense or breacher shotgun - or any close-quarters combat operation. It's a drop-in replacement for your shotgun's factory forend that totally eliminates the need for extra mounts, questionable tape-up jobs, and loose wires for pressure switches. It's all self-contained within the sleek, comfortable ergonomic form that also makes cycling the action and controlling the gun easier and more comfortable. Runs on two CR-123A lithium batteries (and who doesn't already have a few devices that use those?) for up to 1.5 hours. The elongated switch pad can be operated by almost any size hand AND it's ambidextrous. Made of a super-tough reinforced molded nylon polymer in Black or Safety Orange. IPX7 waterproof rated. **Mossberg 500/590** fits 12 gauge guns with 7/16" action tube; separate model for the 590 Shockwave. **Remington 870** fits most 12 gauge guns, except for 870 Express Supermag. **USA**

TLR-3 COMPACT WEAPON LIGHT

TLR-3 Get In A Pistol-Mountable Package!

Even smaller than the popular TLR-1/2 series, this ultra-low-profile light uses the same system of interchangeable locating keys as the rest of the TLR series to fit a wide variety of pistol receiver rails. Streamlight's C4 LED technology project a high intensity, 90-lumen beam, while electronic power-control system helps maintain consistent brightness. Parabolic reflector and Borofloat glass lens produce a focused beam with minimal flare at the edges. One CR2 lithium battery, included, provides 1 1/2 hours of continuous operation and a storage life up to 10 years. Ambidextrous switch offers an instant choice of momentary or steady-on operation. Rail clamp system allows easy, one-handed attachment/removal from the side of the weapon, so hands stay away from the muzzle. Waterproof to 1 meter for 30 minutes. **USA**

SPECS: Reinforced polymer body and anodized aluminum lens assembly, black. 2 1/4" (7cm) long, 1 1/8" (2.9cm) wide, 1 1/2" (3.8cm) high from top of rail clamp to bottom of housing. 2.4 oz. (67g) weight with battery. Fits MIL-STD 1913 Picatinny rail, and includes five rail keys to allow installation on Beretta 90-Two and Vertec, Glock, Kel-Tec PF-9, Kimber TLE/RLII, Sig GSR, Smith & Wesson M&P and TSW, Springfield XD compact and full frame, Springfield 1911, and others.

STREAMLIGHT® TACTICAL WEAPON LIGHTS

Powerful, Compact, Feather-Weight Lighting With Laser Sight Option

Gun-mounted light illuminates dangerous places with intense, white light. Ambidextrous, momentary or constant-on paddle switch lets you control light output to match your needs. High-output C4® LED lamp produces a uniform beam with peripheral illumination and no hot spots or shadows. Runs on two CR-123 lithium batteries for up to 2.5 hours of continuous runtime. Rugged aluminum housing has unique locking bar system with interchangeable locating keys for secure mounting directly to MIL-STD 1913 Picatinny, Glock-style, S&W 99, S&W TSW, and Beretta 90-Two accessory rails. Fits all holsters that accept pistols mounted with the earlier Streamlight M-3/-5/-6 series lights.

- TLR-1 WEAPON LIGHT - TLR-1** produces 300 lumens continuous output. **TLR-1s** also outputs 300 lumens and adds a strobe setting instantly activated by two, rapid, successive taps on the paddle. High-output **TLR-1 HL** provides up to 630 lumens of intense white light to illuminate large areas, ideal for clearing a room or searching an alley. Also has programmable strobe setting. Available in Black, Flat Dark Earth (FDE) and Flat Dark Earth Brown. **TLR-1 HPL** delivers an astonishing 775 lumens of white light with excellent peripheral illumination and maximum down-range performance. **SPECS:** Machined aluminum, anodized, matte black. 3 1/4" (8.3cm) long x 1 1/2" (3.8cm) wide x 1 1/8" (3.7cm) high. Uses two CR-123 lithium batteries, included.

TLR-1 HPL

TLR-2 WEAPON LIGHT/LASER SIGHT - Expands the TLR-1 system with a high visibility, red 650-660 nm aiming laser to aid in precise shot placement. Selector switch lets you choose light only, laser only, or light plus laser illumination. Laser is fully adjustable for windage and elevation, with screws mounted in brass bushings for precise settings and reliable return to zero. **TLR-2** produces 300 lumens continuous light output. **TLR-2s** outputs 300 lumens and adds a strobe setting. **TLR-2 HL** provides up to 800 lumens of intense white light to illuminate large areas, ideal for clearing a room or searching an alley. Also has programmable strobe setting. **TLR-2 HL G** also offers a powerful 800-lumen light output plus a 510-530 nm green laser for even longer-range targeting than the red laser TLR-2 models. **SPECS:** Machined aluminum, anodized, matte black. 3 1/4" (8.3cm) long x 1 1/2" (3.8cm) wide x 1 1/4" (4.5cm) high. Uses two CR-123 lithium batteries, included.

TLR-VIR II LIGHT & INFRARED ILLUMINATOR - Provides 300 lumens of white light, plus integrated IR laser illuminator that provides optimum illumination of target when you're using with night vision gear. You can transition from visible white light to IR illumination by feel, without removing your eyes from the target or breaking your

STREAMLIGHT TLR-6 WEAPON LIGHT

Positively Identify & Acquire Your Target

Engineered to fit today's most popular compact and sub-compact handguns, this combination light and laser sight helps you easily identify and acquire a target. With its C4 LED and textured reflector, it casts a 100-lumen beam out to almost 300 feet. The red laser is centered in the light beam, allowing you to get on target quickly in a high-stress situation when adrenaline is pumping. Ambidextrous switch lets you select laser only, LED only, or both laser and LED. Light automatically shuts off after 10 minutes to preserve battery life. Approximate runtime: 1 hour, light or light and laser; 11 hours, laser only. Impact-resistant, reinforced polymer body doesn't add an ounce of unnecessary weight or bulk to your pistol. Laser can be adjusted for windage and elevation. TLR-6 is sold with gun-specific mounting hardware or in a **Combo Kit** that includes LED/laser module and mounting hardware to fit all the pistols listed below. **NO Laser** - Some models for sub-compact guns are available without the laser sight.

- SPECS:** Hard polymer housing, Black or Flat Dark Earth (FDE) Brown. 2.3" (5.8cm) long, .85" (2.2cm) wide, 1.4" (3.6cm) high. 1.3 oz. (36g) wt. 640-660nm red laser. Includes two 3V CR-1/3 N lithium batteries.

STREAMLIGHT TLR-9/TLR-10 FLEX WEAPON LIGHTS

Versatile, Easy-To-Install Light With Powerful 1,000 Lumen Output; Also Available With Red Laser

TLR-9 w/Light Only

These lights fit a broad range of full-size handguns that have an under-receiver accessory rail. They provide a HUGE 1,000 lumens of bright, concentrated light. Optional strobe mode helps disorient suspects or hostile operators. Integral rail clamp is designed for rapid, tool-free attach/detach from the pistol without placing your hand in front of the muzzle. The TLR-9/10's compact, low-profile form factor minimizes the risk of snagging. A "safe off" function prevents accidental activation to preserve battery life and avoid giving away your position at a bad moment. **TLR-9** has LED light only. **TLR-10** adds red aiming laser. Both are **FLEX** models, meaning they come with Streamlight's **High-mount** ambidextrous control switch installed; optional user-swappable **Low** switch is included. Runs on two CR-123A lithium batteries for up to 1.5 hours continuous runtime (60 hours with laser alone on TLR-10). Maximum range of the beam is 200 meters. Rugged machined aluminum housing with tough, wear- and corrosion-resistant matte black hardcoat anodized finish. IPX7 rated to be waterproof to a depth of 1 meter for 30 minutes. 3.9" long; 4.3 oz. wt. Comes with a "Key Kit" for mounting to a variety of popular pistols, including Beretta 92/M9A1/90Two, Glock 17/19, Kimber 1911, SIG P320, S&W M&P, Springfield XD, and any pistol with an M1913 Picatinny accessory rail.

STREAMLIGHT TLR® RM RAIL-MOUNTED LONG-GUN LIGHT SYSTEMS

Powerful, Versatile, Reliable Illumination for Your Tactical/Home Defense Rifle or Shotgun (or Both!)

TLR RM 1 Light

The low-profile TLR RM 1 comes as a complete illumination package, ready to mount to your firearm. The powerful LED pumps out a brilliant, 500 lumen (5,000 candlea) beam of white light out to 140 meters. It'll run 1.5 hours on one CR-123 battery in steady mode and 3 hours in strobe mode. The precision engineered lens produces a concentrated beam with optimum peripheral illumination. Safe-off lockout prevents battery drain by blocking unintended activation. Housing is IPX7 rated waterproof to 1 meter for 30 minutes. Includes mounting key kit for installation to any rifle or shotgun with a MIL-STD 1913 Picatinny rail. Comes with a direct-operation pushbutton tailcap switch. Can also be purchased with an additional **Remote** pressure switch (pushbutton tailcap switch included); remote switch cable exits at 90° for improved wire routing. **Laser** models come with an integrated 640-660nm red aiming laser in addition to the light (60 hours runtime with laser only). 3.2" OAL. Approx. 3 oz. wt.

STREAMLIGHT TLR-7/TLR-8 WEAPON LIGHTS

Ultra-Compact Illumination Powerhouse for Tactical/Personal Defense Pistols - Laser Sight Options, Too

These ultra-compact variants of the popular TLR series are ideal for mounting on your pistol. "Ultra-compact" does not mean you have to compromise on illuminating power because the LED emitters in these lights put out a blinding 500 lumens of pure, uniform, white light. The beam extends 131 meters, and you've got 1.5 hours of runtime to rely on. Even better, it's powered by a *single* CR-123A lithium battery, and the total package is a mere 2.15" long and weighs in at about 2.5 oz. There's an ambidextrous on/off switch, and a "Safe Off" lockout function that prevents accidental activation and battery run-down. The integral, mount clamps securely to just about any rail you're going to find on a modern full-size or compact pistol. Quick-release lock on the mount enables tool-free installation, AND your hand does not have to go in front of the muzzle to do it. **TLR-7** has the 500 lumen light only. **TLR-7 Gun Model-Specific** configurations come with necessary mounting hardware for specific gun models, listed below. **TLR-8** adds a **Red** or **Green** aiming laser, but only a tiny amount of additional bulk and weight (2.64 oz.). Runtime with laser only: 18 hours (red), 11 hours (green). **Flex** models include user-customizable ambidextrous switches with either a low or high position to match your shooting style.

SPECS: Rugged machined aluminum housing, hardcoat anodized, matte black. Operating temperature range: -40° F to +120° F. IPX7 waterproof to 1m for 30 minutes.

TLR RM 2 LONG GUN LIGHT - The RM 2 is essentially the RM 1 with *double* the light output at 1,000 lumens, with a larger form-factor because it's powered by TWO CR-123 Lithium ion batteries. The extra size pays off, though, because aside from the extra output, the RM 2 casts its brilliant white beam of light up to 200 meters - and you still get the RM 1's 1.5 hour runtime. 4.55" OAL. Approx. 4.6 oz. wt. Comes with mounting hardware for attachment to MIL-STD 1913 Picatinny rail, and with the same **Remote Switch** and **Laser Sight** options as the RM 1.

GUARANTEED. FOREVER.® SINCE 1939

STREAMLIGHT PROTAC HL-X WEAPON LIGHT

Powerful 1,000 Lumen Illumination + Multiple Operating Modes for Maximum Versatility

The ProTac HL-X is specifically designed for use on tactical shotguns, carbines, rifles, and SBRs, and provides impressive illumination up to 1,000 lumens – plus great versatility in how that light is deployed. It's a "dual fuel" light, so it can run on the included Streamlight 18650 lithium ion rechargeable battery OR two standard CR-123A disposable lithium cells. It offers 3 operating modes: High – 1,000 lumens with a 332m reach for 1.5 hours or 1.25 hours (CR-123As); Low – 60 lumens with a 80m reach for 23 hours (20 hours on CR-123As); Strobe – for signaling or disorienting assailants with 3.25-hour runtime (2.5, CR-123As). Power-management circuitry ensures you get full output through the entire runtime – no tail-off as the battery runs down. Streamlight's TEN-TAP™ programming system lets you determine how you cycle through the operating modes – and you can do it via the pushbutton tailcap switch OR the included remote pressure switch. The integral mount clamps securely to any MIL-STD 1913 Picatinny accessory rail. Rugged aluminum housing with hardcoat anodized finish. IPX7 waterproof to 1 meter for 30 minutes (with tailcap switch), IPX4 water-resistant rated with remote switch.

CLOUD DEFENSIVE LIGHT CONTROL SYSTEM

Streamlight model

At Last! A Secure, Stable Remote Switch Mounting Platform With Cable Management

Weapon light remote pressure switches and "tape" switches only work properly when there's hard, solid surface for them to be pressed against. The LCS solves the problem by providing a hard mounting point for the switch that attaches securely to your Picatinny handguard. Integrated cable channels in both sides of the mount, so you can control excess cable and making the mount totally ambidextrous. Run the cable half-way through a channel, and then have it exit halfway down the channel if you need extra cable slack. The full-length aluminum base ensures optimum tape switch engagement. Rugged machined 6061 T6 aluminum, Type III hardcoat anodized, matte Black (BLK) or Flat Dark Earth (FDE). Separate models for SureFire ST07 and Streamlight ProTac remote switches.

SUREFIRE ST07 REMOTE TAIL SWITCH

Put Switch Exactly Where You Want It For Instantaneous Light Activation

Sealed, weatherproof pressure switch lets you remotely activate your SureFire Weapon-Light for immediate, on-demand target illumination. Plugs directly into the tail cap switch of a variety of SureFire lights. Comes with a 7" long cable ending in the pressure pad that can be taped to the forearm or vertical grip of a tactical rifle or shotgun. Fits all SureFire lights with a plug-in socket in the tailcap, including the X300, X400,

NEW! SUREFIRE XSC MICRO PISTOL LIGHT

350 Lumens of Blinding Light from Your Micro Carry Pistol - Plus Surefire's Reliability, Ergonomics & Ease of Operation

The ultra-lightweight, extremely compact, low-profile XSC delivers 350 lumens of intense white light shaped by Surefire's parabolic reflector technology. It's the ideal accessory for a modern micro-compact concealed carry pistol. And it's optimized for positive target identification at short- to medium-range distances, delivering a bright central beam and ample spill light. Proprietary quick-detach, rechargeable Lithium battery provides fast and easy battery swaps without removing the XSC from the pistol. Battery-mounted "fuel" gauge allows convenient monitoring of charge status, minimizing your chances of being caught with a dead battery. Included charging cradle features two charging bays so you can keep charged spare batteries readily at hand. Surefire's reliable switching provides momentary-on or constant-on modes with the simple press of a button for virtually foolproof, stress-free instant activation. Multiple gauges ensure waterproof/weatherproof protection; the XSC is IPX4-rated (resistant to water splash from any direction).

SUREFIRE XC2 ULTRA-COMPACT PISTOL LIGHT + LASER SIGHT

A Teeny Tiny Light With a Big, Bright Output PLUS Laser Targeting

The SureFire XC2 is one of the easiest-to-use, tiniest and lightest light-plus-laser units on the market. It gives handgun owners an effective illumination and instant-aim option for their defensive pistols. Powered by a single AAA battery (you know, the kind that goes in TV remotes), the XC2 measures only 2 1/8" long and weighs in at a mere 2.1 oz., but its recoil-proof LED emitter pumps out an amazing 300 lumens of clean, uniform, white light. The 635nm red aiming laser gives you that fast, instinctive connection with a target that only a laser sight can give. It's adjustable for windage and elevation, and once zeroed, it will rarely need re-zeroing due to special adjustment screws that won't back out under recoil. Ambidextrous switches give both momentary and constant-on operation from the light and the laser, so you are totally in control. The XC2 is meant to be mounted on working handguns, so it's built tough, with a high-strength aluminum housing (not plastic!) that has a tough, military-grade hardcoat anodized finish. Gasket-sealed to keep moisture away from the electronics, too. Built in mount fits Picatinny and "Universal" pistol rails. Front-facing battery compartment for easy access to the included rechargeable NiMH battery without removing the XC2 from the gun.

SUREFIRE X400 ULTRA WEAPON LIGHT/LASER

Powerful Tactical Illumination For Rail-Equipped Handguns

Compact, lightweight weapon light provides powerful target illumination for tactical pistols equipped with Picatinny and Universal Standard mounting rails. Solid-state, shock-isolated, electronically controlled LED outputs 500 lumens of intense, white light for up to 1 1/2 hours runtime. LED is protected by a tempered Pyrex® lens; anti-reflective coating ensures maximum light transmission. Specially engineered Total Internal Reflection focusing lens tightens light beam to project a more focused beam at longer distances, yet provides enough surround beam to support peripheral vision. Ambidextrous constant on/off toggle switch provides fail-safe operation under stress. Push button, spring-loaded mounting clamp allows you to instantly attach or detach light for any situation. O-ring sealed fittings are waterproof to 70 feet. Adapter plates and mounting hardware for Picatinny and Universal Standard rails included.

The X400 has the same powerful 500 lumen LED and other technical features as the X300 with the addition of a fully-adjustable, super-bright red aiming laser that puts you on target immediately. Makes the X400 the perfect choice for military, law enforcement, and self defense use. Laser outputs 5 milliwatts at a wavelength of 635 nanometers, making the beam brighter and more visible than comparable units. Five-position switch, located behind the laser, offers four modes of operation, including light only, laser only, light and laser together, and two disable positions. Nylok® adjustment screws won't back out under recoil, so loss of zero is a thing of the past. Fully sealed to keep dust and moisture out. Includes adapters and hardware for mounting to Picatinny and Universal Standard rails.

X400UH-A models offer the same capabilities PLUS the ability to interface securely with SureFire's Masterfire Rapid Deploy Holster. Available with Red or Green laser. X400VH-B-IRC has an infrared laser sight for use with night vision devices (NVD) and a 350 lumen output from its LED illuminator. Just push and twist the self-locking bezel selector to switch to IR mode and get 120 mW of non-visible (to the naked eye) infrared illumination from the commercially available 0.7 mW infrared laser – no infrared filter required. There is also an lockout off setting on the bezel.

SPECS: Aluminum body, mil-spec Type III hardcoat anodized, black. Approx. 3 1/8" (9.2cm) long, 1 1/8" (3.7cm) wide, 1 1/8" (4.8cm) high. 4.4 oz. (125g) wt., with two, included, CR-123A lithium batteries installed. Output: 500 lumens of light for up to 1 1/2 hours.

(Half a slot? At least, you have it if you need it!) The mount also comes with a detachable hand-stop that helps you maintain a firm hold on the forearm for enhanced control and better pointability. Also prevents

SUREFIRE X300U ULTRA WEAPON LIGHT

Compact, Blindingly Powerful Light Works on Both Handguns & Long Guns

Lightweight, powerful weaponlight has integral mount that fits onto universal handgun rails or Picatinny rails and gives blinding illumination and fast target identification. Intuitive, ambidextrous controls make it easy to activate the light and to switch between momentary- and constant-on. Accepts Surefire remote switches, sold separately, that allow for handgun grip activation, or mounting on longer rifles and shotguns. With a maximum output of up to 1,000 lumens, it has an LED lamp that runs for up to 1 1/2 hours on two CR-123A batteries, included. Integral mounts enable rapid attachment to and removal from either Universal or Picatinny rails, so ideal for both pistol and rifle/carbine/SBR use. T-Slot mount locks to the rail with a traditional thumbscrew. Rail-Lock® mount has quick release pushbutton lock for the ultimate in mount/dismount speed. X300UH-B light has circuitry and necessary interface for use with SureFire's Masterfire Rapid Deploy Holster. 600 lumen output; 1.5 hour runtime.

SPECS: 3.6" (9.1cm) long, 4 oz. (113g) wt with batteries.

ARISAKA DEFENSE M-LOK® SCOUT LIGHT MOUNTS

Inline in use

Inline model

Rugged, Versatile, Low-Profile Mounts for Popular Weapon Lights

These mounts enable installation of popular Arisaka, Streamlight, and SureFire weapon lights on rifles with M-LOK® handguards. These lights typically come with Picatinny rail mounts, but with the growing popularity of Magpul's M-LOK® attachment system, more and more operators have a need for a robust, secure light mount that's compatible with it. And let's face it, the days of taping a light to handguard of an M16 are over! The minimal-profile Arisaka mount replaces the light's stock Picatinny mount, AND it is especially suited to handguards that have 45-degree mounting flats. When installed on a 45-degree flat, the mount has 3 adjustment positions to allow proper clearance for light in relation to the front sight or other accessories. Available models: Inline positions light over the centerline of the rail flat; Offset lets you locate the light in the 1:30, 4:30, 6:30 or 10:30 positions. Machined from 7075 T6 aluminum, with an MIL-A-8625 hardcoat anodized matte black finish. Screws for attaching mount to light body are included. Compatible with a variety of popular lights including the Arisaka 300/600 series; Streamlight Protac Rail Mount 1, 2 and HL-X, and the SureFire M300/M600 series.

SCOUT LIGHTS - LONG GUN WEAPON LIGHTS

Powerful, Rugged, R-E-L-I-A-B-L-E On-Weapon Lighting Systems - Customize to Your Specific Needs

SureFire's Scout Lights mount easily to Picatinny handguards and come in a variety of sizes, output levels, and feature combinations, so you can set up the perfect custom illumination system for your tactical rifle or shotgun. These lights are designed for use on hard-working guns. Housings are machined aluminum with a tough, military-type hardcoat anodized finish, and O-ring seals that keep moisture out. All are fitted with SureFire LED emitters that are highly resistant to shock, impact, and recoil. They generate their intense light output while creating next-to-no heat. Power comes from two CR-123A lithium batteries (unless otherwise noted), so you get long runtimes, bolstered by electronic power-management circuitry that keeps the light working at full brightness longer, without the "fade" that afflicts cheap weapon lights as the battery runs down. MIL-STD 1913 Picatinny mounts come with these lights as standard equipment; some include QD release levers, so you can get your light on and off the weapon STP (Sooner Than Possible). ■

SCOUT LIGHT PRO - Built to endure in combat without any sacrifice of weapon maneuverability. With its recoil-proof, ultra-high-output LED delivering 1,000 lumens of intense white light, the Scout Light Pro is ready for action. Surefire's proprietary TIR lens shapes the light into a far-reaching beam with ample surround light for exceptional peripheral vision, making it ideal for medium- to longer-range applications. SureFire's new Low-Profile Mount (LPM) delivers unprecedented versatility, allowing the user to optimize the light's position relative to the rail. The LPM easily and securely attaches to any MIL-STD-1913 Picatinny or M-LOK rail, so whichever one you have on your rifle, you're good to go. The light is easily activated by clicking its pushbutton tailcap switch. Rugged and reliable, the Scout Light Pro is constructed of lightweight aerospace aluminum with a hardcoat anodized finish. O-ring sealed to keep out the elements.

- #152-000-314 Scout Light Pro, Black, 6B34G50 \$ 296.00
- #152-000-315 Scout Light Pro, Tan, 6B34G50 296.00

SCOUT LIGHT PRO DUAL-FUEL - The Scout Light Pro Dual Fuel unites the combat-proven elements of the M600DF Scout Light with Surefire's Low-Profile Mount (LPM) to deliver unprecedented versatility, allowing the user to optimize the light's position relative to the rail. The rugged and reliable LPM easily and securely attaches to any MIL-STD-1913 Picatinny OR M-LOK rail. The recoil-proof, ultra-high-output LED delivers 1,200 lumens of blinding white light with CR-123A batteries or 1,500 lumens of light with the included SF18650B rechargeable lithium-ion battery - the Dual Fuel options. The Total Internal Reflection (TIR) lens shapes the beam for plenty of reach and ample surround light, making the Pro DF ideal for close- to longer-range applications. Constructed of lightweight aerospace aluminum, mil-spec hard-anodized and O-ring sealed to keep out the elements, the Scout Light Pro Dual Fuel is a new twist on a legendary weapon light system.

- #152-000-312 Scout Light Pro Dual Fuel, Black, 6B34G50 \$ 296.00
- #152-000-313 Scout Light Pro Dual Fuel, Tan, 6B34G50 296.00

SCOUT LIGHT PRO INFRARED - Control the night with the Scout Light Pro IR. Powered by two CR-123A lithium batteries, it pumps out 350 lumens of white light and 120 mW of IR output. Select the proper light spectrum for the task at hand by simply rotating the bezel. SureFire's proprietary TIR lens delivers a far-reaching, high-intensity beam with ample surround light. Activation is simple: just click

its pushbutton tailcap switch. Surefire's Low-Profile Mount (LPM) delivers unprecedented versatility, allowing the user to optimize the light's position relative to the rail. The rugged, reliable LPM easily and securely clamps to any MIL-STD-1913 Picatinny or M-LOK rail. Constructed of lightweight aerospace aluminum with a mil-spec hardcoat anodized finish, and O-ring sealed to keep out the elements, the rugged Scout Light Pro IR will endure in combat without sacrificing weapon maneuverability.

- #152-000-316 Scout Light Pro Infrared, Black, 6B34G50 \$ 404.00
- #152-000-317 Scout Light Pro Infrared, Tan, 6B34G50 404.00

M600DF DUAL FUEL - This light pumps out an astounding 1,500 lumens of clean, brilliant, white light for up to 1.5 hours with the included SF18650B Micro-USB rechargeable Lithium-ion battery. "Dual Fuel" means that if the Li cell runs down, you can bum a pair of standard disposable CR-123A lithium cells off a buddy and get a still-impressive 1,200 lumen output. All this in a package that's only 5.6" long. Pushbutton tailcap switch for momentary or constant-on.

- #152-000-259 M600DF Scout Light, Tan, 2E248A49 \$ 269.99

MINI SCOUT LIGHT PRO - Less mass, more power - what a deal, huh? The Mini Scout Light Pro is mighty in its output but minimal in stature. It runs on a single CR-123A lithium battery, but its virtually indestructible LED devours darkness with 500 lumens of light focused by a TIR lens into a high-intensity beam. It's ideal for close- to longer-range operations. Surefire's Low-Profile Mount (LPM) delivers unprecedented versatility, allowing the user to optimize the light's position relative to the rail. The LPM easily and securely attaches to any MIL-STD-1913 Picatinny or M-LOK rail. Activation of the Mini Scout Light Pro is easy: just click the pushbutton tailcap switch. Machined from lightweight aerospace aluminum with a tough mil-spec hardcoat anodized finish and O-ring sealed to keep out the elements, the ultra-compact Mini Scout Light Pro withstands the rigors of combat without weighing down your weapon or YOU!

- #152-000-309 Mini Scout Light Pro, Blk, 6B34G50... \$ 296.00
- #152-000-310 Mini Scout Light Pro, Tan, 6B34G50 .. 296.00

MINI SCOUT LIGHT PRO INFRARED - Dominate the dark with the Mini Scout Light Pro IR, one of the most versatile 3-volt models in Surefire's line of multi-spectrum Scout Lights. Powered by a single CR-123A lithium battery, it produces 250 lumens of brilliant white light or 100 mW of invisible infrared illumination for use with night vision devices - and there's no need for IR filters or spare lamps. It features Surefire's Low-Profile Mount (LPM), which delivers unprecedented versatility by allowing the user to optimize the light's position relative to the rail. The LPM easily and securely attaches to any MIL-STD-1913 Picatinny or M-LOK rail. To switch between white light, disabled, and infrared modes, you simply twist the knurled front portion of the bezel. In either mode, the Mini Scout Light Pro IR's TIR lens produces a tight beam suited for close- to medium-range applications. Constructed of high-strength aerospace aluminum with a hard-anodized finish for superior toughness and corrosion resistance, it's built to withstand the rigors of hard use.

- #152-000-311 Mini Scout Light Pro Infrared, Black, 6B34G50 \$ 404.00

MICRO SCOUT LIGHT PRO - Surefire's most compact weapon light to bear the "Scout Light" name, the Micro is designed from the ground up to deliver close-quarters illumination with minimal impact on your weapon's profile. Its minimal size and weight make it an ideal choice for positive target ID, low-light navigation, or

SUREFIRE

REMINGTON 870 FOREND WEAPON LIGHT

The Easiest Possible Way To Integrate a Light Into Your Home Defense or Tactical Shotgun

Completely replaces the factory Remington 870 forend with a polymer forend encasing a powerful, integrated LED head that cranks out a blinding 1,000 lumens of white light (1.25 hours runtime) and integral ergonomic switching. The right side has a long momentary-on tape switch and a system-disable toggle switch; the left side has the constant-on toggle switch. The virtually indestructible LED is focused by a Total Internal Reflection (TIR) lens that creates a farther-reaching beam well-suited to close-/medium-range engagements. Intuitive rocker switch allows the user to completely deactivate the light for transport, storage, or additional light security. The light assembly itself is constructed of mil-spec hardcoat anodized aluminum with an optically coated tempered glass lens, O-ring and gasket seals. The ergonomic forend body is constructed of tough, lightweight, reinforced molded polymer. A forward handstop and pronounced ridges on the underside give you an excellent hold. Whether your mission involves breaching an enemy stronghold or repelling home invaders, this light is engineered to improve your survival odds. ■

- #152-000-306 Remington 870 Forend Weapon Light, 6B34G50 \$ 539.00

Sensitive Site Exploitation. You won't even know it's there unless you need it. Focused through Surefire's smooth parabolic reflector, the Micro Scout Light Pro's recoil-proof, premium LED generates a 300-lumen beam with 1.25 hours of runtime from a single rechargeable NiMH AAA battery. A shrouded, pushbutton tailcap provides easy, instant momentary-on OR constant-on activation. Surefire's Low-Profile Mount (LPM) gives you the flexibility to adjust the Micro Scout Light Pro so it's close to the weapon. The LPM ships with both a MIL-STD-1913 Picatinny AND M-LOK® clamps for hassle-free mounting options. Constructed of rugged aerospace aluminum and MIL-A-8625 Type III, Class 2 hard-anodized for scratch and corrosion resistance, the Micro Scout Light is O-ring sealed to keep out the elements, ensuring it's ready to endure the harshest conditions. The Micro Scout Light Pro will help you prevail in the most extreme conditions. Overall length 3.86". 2.1 oz. wt. with battery.

FLASHLIGHT/LASER MOUNT

Offset For Fast, Easy Access To Activation Switches

Extra-wide, offset base mounts flashlights and lasers to any railed handguard for easy light/laser activation using your thumb without your hand ever leaving the handguard or vertical grip. Ambidextrous design can be installed at the 3- or 9- o'clock positions to accommodate right- or left-handed shooters. Two, steel, Allen head screws pull the clamp tight to the rail, so it won't shoot loose. Made from lightweight, PVC alloy thermoplastic that's resistant to most solvents. Adjustable to fit flashlights and lasers from .800" to 1" diameter. ■

VLTOR

SM-E SCOUT LIGHT MOUNT

Turns Handheld Flashlight Into Compact, Rail-Mounted Weaponlight

All-metal, low-profile mount converts a SureFire or similar handheld tactical flashlight into a compact weaponlight that gives you the versatility of weapon-mounted illumination without the expense of a separate light. Quick-detach design lets you remove the light from the gun and return it to handheld use in seconds. Triple-function cross-bolt with large, easy-grasp thumbscrew tightens the mount around the light body to prevent slippage under recoil and clamps the mount to any MIL-STD 1913 Picatinny accessory rail. Also serves as a recoil lug to prevent unwanted movement of the mount on the rail. Retaining pin captures cross-bolt so it can't fall off when the mount is removed from the weapon. Models available to fit three flashlight body diameters, listed below. Off-set models let you position the light to the left, right, or below the rail, approximately 1/4" off-set from the centerline of the rail. ■

SPECS: Aluminum, hardcoat anodized, matte black. Steel cross-bolt, black. Fits lights with .810" to .826" O.D., including SureFire Executive series.

- #100-003-714 SM-E Scout Mount, 3A33D24 \$ 34.99

FALCON INDUSTRIES AR-15/M16 UNIVERSAL ACCESSORY MOUNTING PLATFORM

Easy Installation; Mount Tactical Accessories

Injection-molded, nylon-based, polymer platform installs easily on tube and conventional two-piece AR-15 handguards to mount lights, lasers, and tactical gear. Six mounting holes and lots of slots make it adaptable to different situations. Comes complete with three mounting screws and flat nuts. Accepts Picatinny accessories. ■

MESA TACTICAL REMINGTON/BENELLI TACTICAL BARREL/MAGAZINE CLAMP

Secures Extended Mag Tube & Mounts Accessories Up Front

Lightweight, aluminum clamp locks barrel and extended magazine tube together to form a rigid, rock-solid assembly. Can be used as a tactical light mount: install a 1" diameter light in one side of the clamp and secure the other side to the barrel or magazine. Left- and right-side sling swivel sockets accept standard pushbutton swivels. Two steel Allen head screws pull the clamp halves together for a tight, non-slip hold. Also available with a 2" long, 4-slot, MIL-STD 1913 Picatinny rail that can be installed in the 3- or 9- o'clock position, for mounting additional accessories. Fits Remington 870, 1100, 11-87 and Benelli M1, M2, M4, M1014, 12 gauge shotguns. **USA**

SPECS: 6061 T6 aluminum, mil-spec Type 3 hardcoat anodized, matte black. Clamp - 1 1/2" (3.8cm) long, 1 1/8" (3.5cm) wide, 1 1/8" (4.1cm) high. Rail - 2" (5.1cm) long. Includes mounting hardware. Fits Remington 870/1100/11-87 and Benelli M1/M2/M4/M1014, 12 gauge only.

GUNSMITH KINKS®

AN ENDLESS FOUNTAIN OF KNOWLEDGE COVERING
FIREARM CARE, SERVICE, REPAIR, BUILDING

- NEW RIGHT ARM FOR ANYONE WHO OWNS A GUN
- UNIQUE - UNEQUALED - AUTHENTIC
- NOTHING LIKE THE GUNSMITH KINKS SERIES HAS EVER BEEN DONE BEFORE - NOR CAN IT BE DUPLICATED
- A WEALTH OF FACTS & KNOW-HOW YOU CAN'T FIND IN ANY OTHER BOOK - NOT EVEN THE INTERNET!
- THE COMBINED KNOWLEDGE OF HUNDREDS - THOUSANDS!! - OF GUNSMITHS & DEDICATED GUN LOVERS!

Originally collected and squirreled away by **Bob Brownell** during 30 years' association with the nation's best! Edited by **Frank Brownell** and published by popular demand of the professional gunsmith trade for their own in-shop use.

The wisdom of folks who know, who've done the work - Between the covers of each *Gunsmith Kinks* volume are the jewels and gems, the intimate trade secrets of the country's leading full- and part-time gunsmiths, writers and basic authorities - proving that no one individual can know all the answers. It's written in the language of the gun shop - so "gunsmithy" it even smells of bore cleaner.

FOR THE HUNTER - it is worth its weight in gold - just one of the many in-field "Service Kinks" by someone who has already solved the problem could save your hunt!

FOR THE TARGET SHOOTER - Any of the numerous accuracy gimmicks by the men who build the winners could bring those extra points for you when the chips are down.

FOR THE HOBBYIST - A Mother Lode of ideas and suggestions 100 men couldn't live long enough to develop. You will revel in the many ways to handle those touchy jobs that can cost you hours of work or a ruined gun if you don't know the answer.

FOR THE MILLIONS OF GUN BUFFS - Here is how the gunsmiths do those wondrous jobs. Knowing is understanding and appreciating their great skill and unbelievable ingenuity. More than ever, you will wonder how they can do it so beautifully without charging more!

PLUS - PLUS - PLUS! Especially written, detailed, illustrated "how-to" articles in such special fields as • The Art of the Master Metal Polisher • Basics of Engraving • Rust and Chemical Bluing • Tool Sharpening by the Masters • Barrel Turning and Chambering • Regular and Electric Checkering • Stock Designs • **Many, many more.**

AND all the jokes gunsmiths have laughed at over the years. Recipes for foods that have tickled their gullets, and cartoons that have tickled their bellies!

IT'S ALL IN FOUR PACKED VOLUMES:

The Original *Gunsmith Kinks* - 504 pages with 609 separate subject headings and 317 detailed photographs, blueprints and drawings.

Kinks II - 504 pages with 719 separate subject headings and 252 detailed photographs and drawings.

Kinks III - 512 pages with 778 separate subject headings and 260 detailed photographs and drawings.

Kinks 4 - 552 pages with 706 *Kinks*®, instructions and stories, plus 332 drawings and photographs.

All four volumes have a deluxe, heavy-duty, Buckram-linen hard cover, and sewn binding. **USA**
