## ARMAGEDDON GEAR GUNSMITH'S APRON

MultiCam shown

Keeps Your Clothes Clean When You Work on Guns

We've all had this happen: you're doing some gun work wearing clothes you should *not* have on around grease and burnt powder residue and other gun-related schmutz. But you're being careful right? Until you look down and see a big smudge of something on your good shirt... and you have that sinking feeling it's not gonna come out easily in the wash. Armageddon Gear's Gunsmith Apron protects your snazzy duds while you're working on your - or your customers' - guns. It's made of military-grade 1,000-denier Cordura nylon for maximum durability and imperviousness to oils, solvents, other chemicals, dust, dirt, and debris. Sturdy 2" wide elasticized shoulder straps are adjustable to keep the apron fitting comfortably for all-day use when that "simple" job turns into something more. Lotsa pockets for small tools and parts, plus a Velcro® loop field for patches or small pouches, AND it even has four columns of PALS webbing with mil-spec bartacks so you can attach whatever you want up front where it'll be handy. Maybe Armageddon should call this the "Tactical Gunsmith Apron"?

## BROWNELLS ACRA-QUICK™ & ACRA-20™

Mixes Perfectly, Hardens Fast, Holds Like Iron

Our revolutionary ACRAQUICK/ACRA-20 family of two part epoxies is unmatched for strength, hardening speed, and their ability to bond to almost any material. They bond to wood, metal, ceramics, and most plastics with all the famous strength and holding power of ACRAGLAS. Once cured, they're virtually impervious to the effects of moisture, sunlight, frigid temperatures, solvents, detergents, and most chemicals. Unlike lesser adhesives, they will not shrink, crack, or weaken over time. All ACRA epoxy formulas harden strong enough to handle in minutes and cure to full strength in 24 hours. And, they all dry clear.

Standard ACRA-QUICK 3-MINUTE EPOXY has a mixed working time of 2-3 minutes and is strong enough to handle 5 minutes after application (at 70° F). ACRA-QUICK and ACRA-20 are semi-fluid formulas that flow well, fill gaps, and get into those hard-to-reach spots. ACRA-20 has a longer, 15-20 minute working time and reaches handling strength in 60 minutes. It will set up in temperatures down to 0° F, and it can be colored with any of our ACRAGLAS dyes. ACRA-QUICK GEL sets up in 3-5 minutes, and their no-drip formulas are perfect for repairs where gravity works against you.

All ACRA epoxies come with a reusable, no-mess, application gun that automatically blends the resin and hardener to a perfect 1-to-1 ratio as you apply it to the work area. 

SPECS: Each kit contains: 1.6 fl. oz. (50 ml) epoxy cartridge (Acra-Quick, Acra-Quick Gel, or Acra-20, depending on kit), 2 mixing tips, 1 application gun.
